1. Introduction

Himachal Pradesh is majestic, almost mythic terrain and famous for its beauty and serenity, its rich culture and religious heritage. The state has diverse ecosystem, rivers and valleys, and has a population of 7.5 million and covers 55,673 sq. km ranging from foothills of Shivalik to the mid hills (300 - 6816 mts above MSL), high hills and cold dry zones of the upper Himalayas. It is spread across valleys with many perennial rivers flowing through them. Almost 90% of the state's population lives in rural areas. Agriculture, horticulture, hydropower and tourism are important constituents of the state's economy. The state has 12 districts and Mandi is 2nd district in population wise having 14.58%.

The district lies in central Himachal and is famous for its tourist stations and Himalayan Treks connecting the trails with far remote regions between the adjacent districts of Kullu Shimla, Bilaspur, Solan, Hamirpur and Kangra districts which are bordered at North-North East, East, West and South of Mandi respectively. The District is also a home to some of the Ancient settlements, Traditional Handloom and Apple Cultivation Fields & Beas and Setluj River are the life line and main drain.

The largest valley in the district is called the Balh Valley, though other valleys such Karsog and Hatli valleys are also known for the production of food grains, which is also known as the Valley of the Gods. There is also a town called Mandi which is situated on the banks of the Beas River in the northern part of the Balh valley. Where people are hard working

Forests and Forest eco systems are the storehouse of rich biodiversity and play a vital role in preserving the fragile sloppy lands and were primary sources of livelihood for rural population. The rural peoples are directly dependent on the forest resources for their

livelihoods and socio-economic development. The Harsh reality is this that these resources are constantly depleting due to over exploitation, such as Fodder, fuel, NTFP extraction Grazing, Fires, and droughts etc.

Under Druman-Banyorka VFDS two SHGs have been formed for implementing livelihood Improvement activities. One of these is, "Har Har Mahadev" concerned with Mushroom Cultivation. Group members belong to a weaker section of society and have less land holdings. To raise their socio-economic conditions, they decided to cultivate Button and Dhingri Mushrooms. Technical input for preparing Business Plan was provided by Dr. Pankaj Sood, Principal Scientist & Head Dr. Kavita Sharma & D S Yadav, KVK Mandi at Sunder Nagar. Team consisting of Sh. Vijay Kumar, Subject Matter Specialist, o/o DMU Sunder Nagar, Monika Kumari, FTU Co-coordinator Sarkaghat Range of Suket Forest Division, Mr. Inder Singh Forest Guard, Deo Bradta Beat and Madan Lal Sharma D/R B.O Sarkaghat prepared the business plan under the constant supervision and guidance of V. P. Pathania, Rtd. DFO.

3. Description of SHG

The informal Har Har Mahadev SHG group was formed in Dec 2020 under Druman-Banyorka VFDS to provide Livelihoods Improvement Support by up gradating skill and capacities. The group consists of poor and marginal farmers.

Har Har Mahadev SHG group is mixed group consist of (6 male and 4 female) marginal and financial weaker section of the society having less land resources. Though all Group member grow seasonal and traditional crops. but as the land holding of these members is very small and irrigation facility are less and the production level has reached near saturation, so in

order to meet out their financial requirements and to contribute to the nation production ' they decided to go ahead with Mushroom cultivation along with their traditional crops, which can enhance their income. There are 10 members in this group and their monthly contribution is Rs 100 /- per month. The detail of Group members is as under:-

		:	75kms app.
3.5	Name of the main cities where Products will be sold/ marketed	:	Sarkaghat, Sundernagar,
3.6	Status of backward and forward linkages	:	Backward linkages Training, (KVK)compost bags span added (Horticulture dept.) and Forward linkages Markets exits suppliers etc.

4. Description of product related to Income Generating Activity.

4.1	Name of the Product	::	The Group will be involved in production of Button Mushrooms and Dhingri in controlled environment.
4.2	Method of Product Identification	::	Though the entire Group member grows seasonal vegetable and traditional crops. As their land holding is small, has reached in saturation point of production, so they are not able to meet out their financial requirements' therefore it has been decided by the group member that Mushroom cultivation will enhance their income. Further they usually go to sell their vegetable crops in Sarkaghat Market. Market linkages are already in place. They do not have to spend extra time and money for marketing Mushrooms.
4.3	Consent of SHG /CIG/ Cluster	::	Consent is attached as an Annexure.

5. Production Processes.

The training of Mushroom cultivation has been arranged by JICA project at KVK Sundernagar. The full cost of training with spot demonstration is born by the JICA Project.

The Group decided initially to start with Dhingri Mushroom Production, as training has been completed during February and the following months of march April/May, June July are more suitable for cultivating this mushroom. 250 Compost spawn added Bags will be purchased and fixed in hired/ rented room.

Three tier wooden /Bamboo racks fitting, along with two Exhaust fans one for fresh air and another at the bottom to expel out the inner air will be installed. one ceiling Fan to lower the room temperature and other (heat blower) to increase the room temperatures, one Dry and wet thermometers will be installed in the hall to maintain the required room temperature. The room will be washed and sanitized with formalin (5ml/liter) twice to thrice before loading the Bags. The business plan with two crops of Button Mushrooms and two crop of Dhingri (70 to 75 days cycle for each). (August to Feb are best months for Button Mushroom and March to July for Dhingri) has been prepared after having through discussions with the group.

The Group members will work 1hrs daily, half an hour in the morning and half an hour in the evening.

6. Description of Production Planning:

6.1	Production Cycle(75 days)	::	<p>In Mandi district Button Mushroom can be grown from September to March. After adding spawn in the compost bag, mushroom takes 30 to 40 days to pinup. There after three flushes can be taken .In total 75 days are required to take the three flushes of mushroom crop. The production cycle of one crop will be 75days.In a year four cycles of crop will be repeated as per detailbelow:-</p> <p>1stcrop of Dhingri Mushroom (May to end of July). 2ndcrop of Button Mushroom (Sept to November = 75days) 3rd crop of Button Mushroom, (Nov to January =75 days) 4th crop of Dhingri Mushroom (February to April= 75 days)</p>
6.2	Manpower required (No)	::	<p>Initially whole group will work together to install/ construct theracks, clean the room andcarry compost bags from the road toproduction sites. Thereafter for first 30 days2 persons for 1hours (1/2 an Hour Morning and ½ an hour evening) on rotation bases will work for cleaning, moistening, temperature regulation etc.</p> <p>For next 31 to 75 days 4-person 3hours for harvesting, caging soil, cleaning, weighing and packing.</p> <p>Marketing hours are not included as one of the members will sell mushrooms along with vegetables in the market regularly.</p> <p>Compost making 4 persons will work for 2hours for 2 days.</p> <p>Labour work will be for total 706 hrs, if we divide it by 8 (hours) it will be 88 days and multiply it by wages rate of Rs 275/day then the cost of labour comes out to be Rs 24200/-</p>
6.3	Source of raw material	::	<p>Horticulture Department, Palampur and Solan district of Himachal Pradesh. Generally, all materials are available in Sundernagar KVK.</p>

6.4	Source of other Resources.	::	-do-
6.5	(i) Quantity required for Button Mushroom (75days) (ii) Quantity required for one cycle of Dhingri i.e75days	::	250 Compost Spawn added Bags, Formalin, 200ml, Bavistin 100 g, packing material (polythene sleeves) 3kg. For Dhingri Spawn: 25 kg, Wheat or other crop straw: 500 kg, Formaline: 2 liter, Bavistin: 100 g, Polysheet: 1 300 transparent Polythene Bags for Dhingri compost, Polythene sleeves 5 kg (3kg for fresh and 2 kg for replacement of torn bags)
6.6	Expected production in 75days	::	Dhingri :-The average production of Dhingri from one bag of compost is around 1.6 kg. For250bags theyieldwillbe 400 kg of Dhingri. Button Mushrooms :- The average production of Mushroom from one Bag is 2.0 kg /1Bag = 2.0 kg 250 Bagsx 2.0kg.= 500kg.

7. Description of Marketing /Sale

7.1	Potential Market Places	::	Durgapur, Rewalsar, Mandi, Sundernagar.
7.2	Distance from unit	::	sarkaghat 15 Km, , Mandi 45 Km, Sundernagar 75 Km.

8. Description of Management among the Members

All Members will take training and divide themselves for daily work operations, Marketing, Linkages with department and with VFDS.

9. SWOT Analyses

Sl.no	Detail/Items	:	Description
1.	Strength	::	All Group members are like minded, well adapted to local and social environment. Production cost is less, Produce is of high quality and Demand, growing cycles are short, production will be throughout the year. Readymade Compost bag are available with Horticulture department at Palampur and Solan. For SHG Financial support Trainings and exposures will be organized by JICA Forestry Project.
2.	Weakness	::	New elf- help Group, lack of experience in Mushroom production /cultivation.
3.	Opportunity	::	Demand is high and return is high.
4.	Threats	::	Internal Conflict in Group, lack of Transparency, and lack high Risk bearing capacity

10. Description of Potential risks and measures to mitigate them

SI.no	Potential risks	:	Measures to mitigate them.
1.	1. At times Harmful infection can destroy the crop 2. Temperature Maintenance and regulations 3. Market saturation	:	First of all, cleanness is to be maintained by washing hands And feet with soap and dip in formalin solution before Entering into the room. Only 2 to 3 persons will enter the room with full kit (cap, Gloves, apron etc.). Regular sprays to avoid fungal attack. With the help of thermo meters, the required temperatures will be maintained with given devices. To do Value addition or dry mushrooms for making Mushroom Pickles, soups and other products etc. in the later Years of production.
2.	Internal Conflict in Group, Transparency	:	Conflicts to be dealt within the initial stage, to eradicate the cause. Equal exposure to all Group members, equal benefit sharing needed Give Respect, and honour to every member.
3.	Market	:	Market is always fluctuating; Demand and supply are always at variance. So members to keep on searching new markets and buyers.
4.	Production	:	Production will be increased slowly as per the market Demand and members' experience.
